

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

March 17, 1911

TURKEY.**SMYRNA—Cholera.**

Consul General Harris reports February 6:

From January 30 to February 5 there were reported 15 cases of cholera with 11 deaths, making a total to date of 337 cases with 205 deaths.

VENEZUELA.**CARACAS—Yellow Fever.**

Chargé d'Affaires Whitehouse reported February 20 to the Department of State:

From January 28 to February 15 there occurred in Caracas 7 cases of yellow fever.

ZANZIBAR.**ZANZIBAR—Smallpox—Examination of Rats.**

Consul Weddell reports:

During the period from December 19 to 31, 1910, there were reported 4 new cases of smallpox and 8 deaths, and during the period from January 1 to 22, 1911, 4 new cases and 5 deaths. The total number of cases reported from June 8, 1910, to January 22, 1911, was 253. The total number of persons vaccinated during the same period was 33,953.

During the 4 weeks ended January 22 there were examined for plague infection 2,341 rats. No plague-infected rats were found.

CHOLERA, YELLOW FEVER, PLAGUE, AND SMALLPOX.**Reports Received During Week Ended March 17, 1911.**

[These tables include cases and deaths recorded in reports received by the Surgeon General, Public Health and Marine-Hospital Service, from American consuls, through the Department of State, and from other sources.]
